

Other Things People Might Do While High on "Bath Salts"

by Baron von Funny

Over the weekend, in Miami, a naked man was found eating the face of another naked man, and was eventually shot by police. Authorities believe the perpetrator was high on "bath salts", a street name for a drug that's a dangerous mix of the amphetamines Methylenedioxypropylvalerone (MDPV), mephedrone, and pyrovalerone, and one that can cause users to lose touch with reality and exhibit psychotic behavior. But the list of potential effects of "bath salt" use doesn't end there...
